Chapter 1

Introduction

Introduction.

A citation [1]. A citation without brackets 2. Multiple citations [1–3].

1.1 Section

This is a section. Here's a reference to a different section: 1.1.1.

1.1.1 Subsection

This is a subsection.

1.2 Section with linebreaks in the name

This is another section.

1.2.1 Another subsection

1.2.1.1 Subsubsection

1.2.1.1.1 Heading level below subsubsection

And I quote:

La la la.

No ident after end of quote.

Another paragraph with a list:

- Item 1
- Item 2

Again, we don't indent here.

Bibliography

- [1] A. A. Aardvark, “Article title,” *Journal One*, vol. 1, no. 1, pp. 1–8, 1900.
- [2] A. A. Abramson and B. B. Barbie, “Article title,” *Journal Two*, vol. 1, no. 1, pp. 9–17, 1900.
- [3] A. A. Abramson, B. B. Barbie, and C. C. Rider, “Article title,” *Journal Three*, vol. 1, no. 1, pp. 192–244, 1900.

Vita

R. Jacob Vogelstein received the Sc. B. degree in Bio-Electrical Engineering from Brown University in 2000, and enrolled in the Biomedical Engineering Ph.D. program at Johns Hopkins University in 2001. He was inducted into the Tau Beta Pi and Sigma Xi honor societies in 1999, won the Brown University Engineering Department's Outstanding Student Award in 2000, and received a National Science Foundation Graduate Research Fellowship in 2002. His research focuses on neuromorphic and neuroprosthetic devices, and his papers have been finalists in the student paper competitions at the 2004 IEEE International Conference of the Engineering in Medicine and Biology Society and the 2004 IEEE International Conference on Electronics, Circuits and Systems.

Starting in June 2007, Jacob will work on the "Revolutionizing Prosthetics 2009" project at the Johns Hopkins University Applied Physics Laboratory in Laurel, MD,

VITA

where he will help to create the next-generation of upper-arm neuroprostheses.
